## Overview

My name is **Duds Daquilanea**. I'm a freelance web and graphics designer here in Iloilo City and run a small home-based venture called **duds online web and graphics designs**.

As a frequent internet user, I design static websites towards functionality and aesthetics. Although flashy websites do get a lot of attention, web users tend to stick to fast loading and content packed web pages. I also customize logos, graphics and photos for a cohesive web design.

Careful planning and flexibility is a key aspect of web design. A good web design targets the intended audience and slows them down long enough to get the organizational message or the business appeal through. Understanding the habits of web users and internet readers is essential to a better website.

## Web Standards

- All codes are lightweight and standards compliant.
- Designs are accessible and compatible with Internet Explorer, Chrome, Safari, Opera and Firefox browsers. Design will not break with resolutions 1024 X 768 px and higher.
- All pages have a title, consistent menu links and customizable meta tag information. All content developed will be keyword rich.
- Support - All critical functionality issues and design bugs will be addressed. General support questions will receive a quick response.

## Prices

I can be flexible with a **budget**. Tell me *how much you can afford and what you need*, and I will tell you what I can deliver with your given budget. It is best to ask for a **quote** based on need than rely on a fixed package. SMEs and independent organizations tend to vary largely in web content. For a quote, email me at [dudsonline@gmail.com](mailto:dudsonline@gmail.com). You can refer to the list below for fixed web hosting / domain registration bundles and web design packages.
